Dear Hiring Manager:

I am excited to apply for the Software Developer Intern position for Summer 2026. As a Computer Science student with hands-on experience in Python, Java, and C/C++, I am eager to contribute to innovative energy solutions while continuing to grow as a software developer. I am particularly drawn to this opportunity because of its focus on building reliable, high-impact systems that support global energy initiatives.

Through coursework and personal projects, I have designed, developed, and tested applications using object-oriented programming principles, emphasizing clean, maintainable, and efficient code. I have collaborated on team-based projects using Git for version control, where I managed branches, resolved merge conflicts, and contributed to organized development workflows. I have also integrated REST APIs into applications to enable seamless communication between systems, strengthening my understanding of backend development and data-driven functionality.

In addition, my academic experience has introduced me to cloud computing fundamentals and modern software development practices. I approach challenges with a problem-solving mindset, take initiative when troubleshooting technical issues, and consistently ensure my work meets high quality standards. I am highly motivated, adaptable, and committed to continuous learning in fast-paced, collaborative environments.

I would welcome the opportunity to contribute my technical skills, strong work ethic, and enthusiasm for innovation to your engineering team. Thank you for your time and consideration. I look forward to the opportunity to further discuss how I can add value as a Software Developer Intern.

Sincerely,
Eric D
